About Us

At Vital Physician House Calls, we believe that nothing should hinder you or a loved one from getting the healthcare services you need. Thus, starting in 2018, we have made it so that we can offer our services and modern medical practices in the place of your comfort and familiarity - your own home.

Among the individuals and care groups we have served include home health agencies, homebound Medicare beneficiaries, and private pay/cash patients, etc.

Unlike the popular perception of receiving your medical services at home, our actual medical doctors, along with physician assistants or nurse practitioners, are equipped to perform most of the same services that you would receive in a hospital and other care office settings. In fact, the only time we would encourage you to seek a physician in a hospital setting is when you are in an emergency.

Our Mission Statement

It is our aim at Vital Physician House Calls to be your top-of-the-mind healthcare provider when you need superior and personalized healthcare services in the privacy of your home.

Our visiting physicians' services can accommodate most of your medical needs just like in an actual hospital setting.

Health Care Provider's Home Visits for Homebound Patients

Attending to your medical needs at home.

Initial and Regular Follow-Up Visits

Making sure that your medical conditions are managed safely at your home.

Bloodwork Services at the Patient's Home

Getting your bloodwork done right at your home.

X-Ray and Sonogram Service at Patient's Home

Bringing you the convenience of in-home diagnostic services.

Our Vision Statement

We envision Vital Physician House Calls to play a significant role in making the Dallas-Fort Worth Area, Texas community more convenient to live in through our visiting physicians' services.
